Skills

- **Languages**: Python, Java
- **Frameworks**: NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn
- **Tools/Platforms**: Excel, PowerPoint, Power BI, Tableau, Git- GitHub
- **Soft Skills**: Problem-Solving, Time Management, Effective Communication, Team Player, Adaptability

Projects

Paddy yield Prediction | NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn| Git — Dec 2025

- Built a ML-based model to predict paddy yield, classify the paddy yield and factors affecting paddy yield.
- Applied EDA, preprocessing, regression, classification, and feature importance analysis using Linear regression and Random Forest.
- Achieved 86% accuracy approximately, identified key agricultural factors affecting yield and classified paddy yield into three categories.

Greenhouse Gas Emissions | Power BI | Git — Dec 2025

- Analyzed greenhouse gas emission data to identify trends, high-emission industries, gas-wise impact and regional variations.
- Cleaned, transformed, and modeled data using Power Query and star schema; created DAX measures for KPIs and trend analysis.
- Derived insights on dominant emission sources, seasonal patterns, and long-term trends, demonstrating strong data visualization and analytical skills.

Exploratory Data Analysis in python | NumPy, Pandas, Matplotlib, Seaborn | Git — Apr 2025

- Conducted EDA on EV population data to uncover real-world trends in EV adoption and factors driving their growth.
- Cleaned and pre-processed the dataset by handling null, duplicate, outlier values, applied visualization techniques and derived insights through feature exploration.
- Provided clear insights on regional EV growth, popular vehicle types and emerging trends to help in better decision-making.

Training

Fundamentals of DSA| LPU| Link — Jun 2025 – Jul 2025

Trainee

- Learnt fundamentals of DSA such as Arrays, LinkedList, Stacks, Queues, Trees and user-friendly Java widget toolkits like Swing, AWT.
- Utilized Java libraries such as Swing, AWT, and AWT Event handling to build a functional and user-friendly application.
- Designed an interactive user interface using Java Swing and AWT components for efficient user interaction.
- Created a GUI-based project Sudoku Game using Backtracking Algorithm.

Certificates

- Build Generative AI Apps and Solutions with No-Code Tools| Infosys| Infosys — Aug 2025
- ChatGPT Made Easy: AI Essentials For Beginners| Infosys| Automata — Aug 2025
- Cloud Computing| NPTEL| Cloud — Jun 2025

Achievements |Extra-Curricular Activities

- Qualified GATE Exam (Computer Science and Information Technology) — Mar 2026
- Achieved Golden badge in Java in HackerRank Platform. — Feb 2026
- Participated in Hackverse Hackathon — Mar 2024
- Participated in CyberDrill: Cyber Security Workshop — Feb 2024

Education

- **Lovely Professional University** — Jalandhar, Punjab
  Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.44** — Since Aug 2023
- **Sri Chaitanya Junior College** — Tirupati, Andhra Pradesh
  Intermediate; **Percentage: 98%** — Jun 2021 - Mar 2023
- **Aditya High School** — Proddatur, Andhra Pradesh
  Matriculation; **Percentage: 99%** — Jun 2020 - Apr 2021
